COMINTERN(EH)

**Portuguese Section of the Comintern
(EH) - in Re-construction.**

**Long live the 73rd
anniversary of
Stalinism-Hoxhaism!**

**I hope we are not divulging a secret, at least for the CC of the
Comintern (SH), we will not be in the totality, but before wwe**

now about Stalinism-Hoxhaism we were no longer in the Dimitrovia interclassist politics, which always ends up favoring the upper middle class and especially the Bourgeoisie that feeds them birthday of Estalinismo-Hoxhaismo!

This rancid and shameless aspect is found in many the so-called revolutionary left-wing organisations, which is why we have left or moved away from them.

From that moment on we had as alternatives to stand still waiting for a new chance to join a revolutionary organization, to adhere to (one or another trotskyism organization anti-Dimitrovian). Both we all have antipathies and chame from Trotsky attitudes in her life: being spy, traitor, etc...

It was not in question or to follow groups based on the ideologist Francisco Martins Rodrigues, besides subscribing to his magazines and newspapers it was also not verified by the constant revisionism that took place from decade to decade. In 1. ° He was an anti-Krutchovian anti-revisionist approaching China and Albania, then entered the adventurism being arrested by the Salazarist dictatorship, until after April 25th, he normally entered the PC(R), which intended to dethrone the PCP, after a few years also cut with this party forming its organization that despite accusing the PC(R) of revisionismo.

After a while it also started ideologically, together with some of its comrades, reaching the defeatist conclusion that due to the delay of the USSR and Albania, with the external interventions (civil and world wars, cold war), they never had a chance to become de facto socialist regimes. And that's when we shocked and started asking ourselves; but if they lasted so many years because they had to fall by force? If they didn't fall with wars because they had to fall with betrayals, just because of differentiations that were formed in the system?

What we concluded was that because of his "great intelligence", he did not draw a valid conclusion, as some Trotskyists already said of saying that there was no remission to the system. Nowadays it is the PCTP/MRPP that bets on this explanation given by Arnaldo Matos, its leader already, equally, deceased.

We found this page and started to devour his literature little by little (there is still enough to have it assimilated as we would like, or we will soon see).

One thing is certain, the aspects that did not convince us of the explanations given have begun to convince us, although there are facts to study or discover.

Really throwing the water out with the baby in it never convinced us, today we looked at the water and it doesn't even seem dirty to us.

Better than me, they make the following quotations from the Comintern (SH):

"Comintern (EH) defines Marxism-Leninism as the ideology of Marxism, which is developed by Leninism.

Marxism-Leninism includes the lessons of Marx, Engels and Leninism.

The Comintern (EH) defines Stalinism as the ideology of Marxism-Leninism, which is developed by Stalinism.

Stalinism-Hoxhaism is the theory and tactics of the world proletarian revolution in general and the theory and tactics of the dictatorship of the world proletariat in particular.

Stalinism-Hoxhaism is the infallible scientific guideline and instructions for the topical, practical solution of the construction of world socialism and its transition to world communism".

The set of studies and lessons, to which we dedicate ourselves and responsibility, each in its own way covering the various basic aspects of life in society and beyond, the human being are the support for pre-revolutionary intervention, for revolution and building a new society, socialism and communism."Comintern (EH) defines Marxism-Leninism as the ideology of Marxism, which is developed by Leninism.
